Subject: Water System Plan

RE: Water System Plan

As I said at last evenings Yelm City Council Meeting, all business and concerns the city of Yelm thinks it has with the Thurston Highlands located in the southwest quadrant of the city should cease and desist. This includes water and traffic plans.

- 1- A plan of this scope will effect private wells running them dry.
- 2- The city does not own this property so why waste plans for it. When I spoke to you today I asked you which bank owns the property. You said you didn't know. Then who are you negotiating/communicating with to put this plan through?
- 3- Is the city planning to purchase this land during the auction June 5th thus making every decision including spending two thirds of a million dollars redeemable?
