Subject: Unapproved Water Mitigation Plan!

To whom it concerns:

As a resident of 93rd ave in Yelm, I am extremely concerned over the water issues that have become evident.

First the community should be publicly notified about the changes the city wishes to impose. like the pumping of five times more water than is currently being done. Yes you can find out if you know where to look and under which hidden agenda, Something like this should be on the front page on the news paper and the city's homepage, *especially if deadlines are concerned!*

Having a well as my only source of water, any impact you make on the aquifer would have a detrimental affect on my quality of life. The fact that the city has not taken into account the affect on surrounding homes either! Pumping five times more water is inexcusable and unacceptable! Therefore as a home owner am requiring that an environmental Impact statement is a must, *now*, before any more decisions are made by the city of Yelm.

Thank you for your time,
Marvalene and Marvin Lucas
