**Importance:** High

### ***Grant Beck, Director, Community Development Department***

***Be advised I have been a resident in Yelm for twenty plus years. My only source of water is a well. Any drop in the aquifer would be a major negative impact on my well-being. I find it appalling that the city has done no studies of what the effect on the aquifer will be on the citizens (whose only source of water is a well) if the city mandates pumping five times more water than is currently being pumped. Therefore, as a resident and tax-paying citizen, I demand an environmental impact study by the city of Yelm be completed before ANY OTHER DECISIONS on the amount of water being pumped by the city are made.***
