Subject: Protection of our drinking WATER Supply is of the UTMOST IMPORTANCE

Grant Beck
City of Yelm Community Dev. Det.

Dear Mr. Beck.

I have lived a few miles off of Highway 507 for over 20 years and I must protest the City of Yelm's attempt to substitute a Mitigated Determination of Non-Significance for an Environment Impact Study re the proposed five-fold increase in water withdrawal quantities.

As I recall, a few years ago a similar problem arose with Yelm's search for water and the former mayor of Rainier voiced in the Nisqually Valley News her concern that your plan would siphon off water from the Rainier City aquifers. I vehemently protest the continuence of this action.
