Subject: Concerned Citizens concerns with the Yelm Wells drilling on the Thurston Highalnds Project

Dear Sirs/Miss/Mrs.

I won't waste your time with much as I am sure you are receiving hundreds of emails but I am deeply concerned at the proposed well drilling that may occur in Thurston Highlands and how this will impact local residents.

Yes, I am a RSE student and concerned about the well at the school but I also have friends living on 93rd aswell as in the local Yelm city limits.

I want to find out why Yelm officials are sidestepping environmental and local residents concerns at their potential expense and abusing them to future financial stress especially in these hard economic times, by accelerating a potentially disastrous decision.....

As a stock trade, complete due diligence is of the utmost importance before making expensive and damaging knee-jerk decisions.....

Short-term gain, Long-term Loss is what this seems.....

Thank You...

Yours

David Naughton.
