Subject: RE: Yelm Public Appeal of substitution of MDNS for an EIS

RE: Public Appeal of substitution of Mitigated Determination of Non-Significance (File Number ENV-08-0397-YL) for an Environmental Impact Study.

Dear Sirs and Madam,

It would be foolish to do anything less than require a full-scale Environmental Impact Study on this water rights, usage and acquisition issue. This is too important to allow the few whose only interest is short-term financial gain, to get away with ruining more of the environment and preventing the community from knowing the full impact of the burden they will come to bear.

I have read the "Mitigated Determination of Non-Significance," and find it full of non-committal statements regarding very serious issues.

Note to Mr. Beck: Please change your tactics and policies, get real, and make sure that everyone in the Yelm Community knows what you are up to and who stands to gain when an EIS is done rather than an MDNS.

Sincerely,
Kathleen Hazelton
