Subject: water resource planning MDNS

I have an interest in the city's dealings with water resource planning since my school (Ramtha's school of enlightenment) is in the area affected by the proposed water drawdown. The City of Yelm's approach to water resource planning fails to protect the public interest by substituting a Mitigated Determination of Non-Significance (MDNS) for an Environmental Impact Statement, which should be required to protect the local aquifer. Please be responsible about the environment and your obligation to those that have elected you to act in their behalf.
