Subject: Disconcerted with the water well drilling on the Thurston Highlands Project

Hi,

I am a concerned Yelm resident that has a lot of questions on the impact of the water table in Yelm if Thurston Highlands drill wells and drop the water table by more than fifteen to twenty three feet when the developments are in.....

How truly deeply will this proposed well drilling in Thurston Highlands impact local residents??

Are Yelm officials avoiding environmental and local residents concerns? Are they abusing their powers?

Is it worth a couple of officials making decisions without consulting those they will impact the most? The residents already in Yelm, loyally paying taxes for years?

Has all the proper research been done and all the necessary people informed and consulted?
