**Subject:** Substitute Mitigated Determination of Non-Significance for an Environmental Impact Study

Gentlemen:

Please be advised that this letter is in reference to the City of Yelm's proposed five-fold increase in water withdrawal quantities. In allowing this the City officials neglecting their obligation to get opinions of the public and independent professionals about the environmental impacts of such an action.

I am a student at the Ramtha School of Enlightenment; and I foresee that by allowing the City to do as they please, the citizens of Yelm and we, the students and staff crippled by the lack of water. This type of event is only seen in other parts of the world, not in the United States. Elected officials are elected to represent the wishes of the majority, as guaranteed by the Constitution. Do we, then just sit and hope that there will be no water shortage if the City officials continue to do everything they wish behind everyone's back? Will you allow that to happen? Will you be a part of that conspiracy? I hope not. Please do all you can to allow the citizens to at least be heard on this matter.

Thank you for your attention to my request.
