Grant Beck  
City of Yelm  
Director, Community Development Dept

This email is in regards to the City of Yelm's substitution of an MDNS, instead of an EIS regarding thier five-fold increase in water withdrawal quantities. I cannot tell from the map I have seen, whether my property is at risk, but would also, like to have a say, as a resident of the city of Yelm, because it could effect future projects that may go by the wayside of public notification and the right to make a citizen response in such matters. My property and residence is at 15510 105th Way SE and appears to be vary close to the area that would be affected. I am going on record, to state my concerns and insist on having a EIS done, before this project is approved. I have sent copies of this concern to Jay Manning and Mary Selecky.

Regards,

Nancy Trent
