Subject: YES to an Environmental Impact Study re: Yelm's Proposed Wells

Greetings!

I say NO to the City of Yelm's attempt to substitute a MDNS instead of having a complete EIS done regarding their proposed five-fold increase of the water withdrawal from the aquifer. I say YES to a complete EIS - the aquifer is too precious to settle for less.

I say that the City of Yelm has no right to make a decision of this magnitude without a thorough study as to how it will impact all of us; and we the people have the right to voice our expertise as well as our opinions and concerns regarding the outcome of this proposal.

Thank you,
