Subject: Yelm substituting an MDNS for an Environmental Impact study

Please do not let the city of Yelm get away with substituting an MDNS for an Environmental Impact study! This is in regards to their proposed 5 fold increase in water withdrawel amounts. I do not want to find that their side stepping an obligation that they are morally obliged to do in office for greed, affects the well water levels of thurston residents (with Yelm mailing address) to where our water supply disappears and we find ourselves with no water.

These city officials feel they can do what they want without telling the public the truth and the facts. Don't let them sell our water to private developers as there is not enough to cover what they purpose without it affecting the local aquifer and everyone who depends on it.
Thank you, Diane Sarah Binder
