Subject: City of Yelm water expansion project

Good morning,

I support a full Environmental Impact Study for the proposed water expansion project that could potentially be a fivefold increase in water withdrawal quantities. I have a business and Rainier Washington and I'm planning to build a home couple miles west of the city of Rainier. We will be on well water and I am concerned by the loss or diminishment of my well flow rate. I was at a Chamber of Commerce luncheon for the city of Yelm and the Mayor himself said that the data regarding the water basin was incomplete and has not been fully evaluated. Therefore, full public discourse and complete environmental studies should be required for this issue.

Thank you,

Billy Gordon, CPA
