Subject: Yelm Water Issue

Hello,

I am writing from a friend's computer since mine is on the fritz. I am very concerned about the proposed water plan being considered for Yelm. I ask you to please represent me and my voice on this very important matter. Please do not do the MDNS for the EIS. We need a independent investigation into the impact on this community. Also, the public needs to be educated and included. I really appreciate your time and your sincere application in this endeavor. It is so important.
Thank you for your time.
