Subject: Public Appeal of Yelm Water Plan

Dear Mr. Beck,

I am very concerned about the Yelm Water Plan. So many properties and people will be impacted by this decision.

Please ask yourself these and other questions:

1. Why is the City of Yelm avoiding public discussion and input on this subject?
2. Why has the City given such short notice of proposed action on such an important matter?
3. Why is the City not interested in reviewing all of the environmental effects that might harm its citizens?
4. Why is the City using an unapproved Water Migration Plan that is incomplete and inadequate?
5. What would you do if your well water suddenly disappeared to private developers by the very City Officials who are supposed to protect the public?

I have written to you today as a student of RSE (Ramtha's School of Enlightenment). This decision could take away my right to spend time in this area studying and learning. Therefore I write as someone who will be affected by this decision.

I am a member of the Storm and Surface Water Advisory Board in Thurston County but am writing not as a Board member but as a concerned public citizen.

To fully protect the public's interest, I respectfully request the City of Yelm provide an Environmental Impact Statement before going forward with this project. A local aquifer should be protected for all who use it, not just a select few.

Please help protect the rights of all citizens that might be impacted.

Thank you for your time and concern. I know you will do the best to protect the majority of All those affected.

Sincerely,
Jacqueline (Jackie Jo) Reid
Yelm, WA
