Subject: City Water

Dear Mr Beck,
Please for the future of ourselves and our children I urge to make right all the water issues presently at hand and to keep the public openly informed of your proposals.
An Environmental Impact Study is a must, now before more water is to be pumped.
Make amends to the cities previous neglects and do not hold the people of Yelm responsible for paying for your hidden agendas.
In Trust, you will heed this call.
Thank You
Kerri Goodwin
