Grant Beck
City of Yelm
Director, Community Dev. Dept.

May 22, 2009

I am a resident of Yelm and a RSE student and I am concern Ed that the City of Yelm is trying to use a Mitigated Determination of Non Significance (MDNS) for an Environmental Impact Study (EIS) regarding their proposed five-fold increase in the water withdrawal quantities.

The city officials are avoiding their obligation to get opinion and concerns of the public and independent professional about the true environmental impact, such as the dropping of the water levels of the aquifer causing those who have their own wells to be force to drill deeper at great expense.

I would like to know why the city is using a draft, unapproved Water Mitigation Plan that is incomplete and inadequate for the Dep. Of Ecology review. This is a Huge new increase of water withdrawals that will impact my interests in Yelm.

Why no Public discussion and input?

This seems to be Government without representation.

Thank you fro you consideration
