Subject: Yelm Water

Hello,

I am writing to ask you to reconsider the MDNS for EIS in regards to the proposed water program in Yelm We need an independent investigation into the impact this would have on our community and we also need a chance to have a public forum where we could hear all the facts and be involved in this very important decision. Water is our most important commodity as landowners and also just as human beings. Please do all that you can to represent my voice in this matter. I live in Yelm and own property here and am very interested in this being handled in the most responsible and accountable way.
Thank you for your time.

Margaret Currie Granger
