

Yelm Avenue West road project update

Yelm High School's entrance has changed and visitors must use the east end access, formerly the exit, located across from Mountainview Road.

This is a permanent access change.

Students must use center turn lane into the new access point.

Westbound commuter traffic should keep right through the YHS school zone.

Police emphasis patrols will take place on the west side of the city as drivers become accustomed to the new road configuration.

This project is near completion. Final paving will commence in September.

For more information, call the hotline at 360-458-8428. Comments or questions are accepted at the end of that recording. All calls will be returned at the caller's request.

Thank you for your patience as we conduct this important transportation enhancement project.
